LANGUAGES

Turkish: Native

English: Intermediate

SOFT SKILLS

- Adaptability
- Decisiveness
- Integrity
- Resilience

SKILLS

- Javascript, Typescript
- Vue.js, React.js
- Tailwindcss, Postcss
- Nuxt.js, Next.js
- Postgresql
- Firebase, Supabase
- Node.js, Express.js

Tools

- npm, pnpm
- Vs code
- Canva, Figma
- Electron.js, Tauri
- Git, Github

PROFILE SUMMARY

A proficient software developer specializing in **Javascript** and Typescript. Experienced in front-end frameworks such as **Vue.js** and React.js, and adept at creating responsive designs with **Tailwindcss** and Postcss. Skilled in server-side rendering with **Nuxt.js** and Next.js, and familiar with numerous UI libraries.

PROJECTS

Budget Tracker

- Developed a comprehensive budget tracking web application using **Vue.js**, **Supabase**, **PostgreSQL**, and **TailwindCSS**. The app allows users to add income and expenses, and presents the data in a visually appealing manner using **Chart.js**. Implemented **multi-language support** with **i18n** and provided **theme options** for enhanced user experience.
- mahmutessiz/budgetApp
- Created a **desktop** version of a budget tracking application using **Tauri, Vite**, and other technologies mentioned above. The app **operates offline**, storing data using a **key-value storage** system. This project showcases my ability to adapt web technologies for desktop applications and design solutions that work both online and offline.
- mahmutessiz/budget-tracker-desktop

Cocktails App

- Developed a cocktail search application using **Nuxt.js, TailwindCSS**, and **Axios**. The app allows users to search for cocktails and provides recipes using a **cocktail API**. Implemented features include autocomplete search functionality and detailed recipe views. Managed project dependencies using **npm**, with a focus on maintaining up-to-date and efficient packages.
